

Steps to install the Meditech Client (4.x also known as the NUI)

Please note: You must be a local admin on the computer

1. Click on 'Click Here to Install Meditech. You should see this appear at the bottom of your screen.

2. Click the "Run" button to install **Workstation4x.exe**.
3. When the installation is complete you will be presented with a **MEDITECH Application Manager** window. You should see a message saying **Application is Up to Date**.
4. Click **OK**.
5. You can now access MEDITECH using the following icon on your desktop.

Set up a MEDITECH Internet based connection

1. **Double click** on your MEDITECH icon. (*this procedure should only need to be done once*)
2. Click **ADD**.
3. Type **MEDITECH_A** for a connection name.
4. Click on **TELNET** for connection type.
5. Click **OK**.
6. Verify the **Terminal Emulation Mode** is set to **MAGIC**.
7. Click in the **Host Name/IP Address** box.
8. Type in **172.30.1.74** for a Host Name/IP Address.
9. Click in the **Telnet Port** box.
10. Type in **23** for the Telnet Port.
11. Click **OK**.
12. Click on the connection named **Meditech_A** so that it is highlighted.
13. Click the **Change Default Connection** so that Meditech_A becomes the default connection.
