

Aspirus Sustainability Program

Fiscal Year 2026

(July 1, 2025 - June 30, 2026)

The Arbor Day Foundation named all 18 Aspirus Health hospitals as 2025 Tree Campus® Healthcare institutions for our commitment to planting, nurturing, and celebrating trees, and for supporting biodiversity.

We integrate sustainability into every stage of our building improvements through energy-efficient mechanical systems, LED lighting, and occupancy sensors that help reduce energy consumption.

Operating across 7 Aspirus locations, our autonomous mowers support sustainable landscaping by reducing air and noise pollution and producing zero direct emissions.

Each of our 11 electric courier vehicles can travel up to 259 miles on a full charge and produce zero direct emissions of air pollutants and greenhouse gases.

Collaboration with green alliances enables us to make data-driven decisions and continuous program improvements.

Our Sustainability initiatives aim to reduce our carbon emissions, focus on energy efficiency, and reduce waste.

Since 2018, we have reduced our greenhouse gas emissions enough to charge 1,284,412,689 smartphones.

In celebration of Arbor Day 2026, we handed out 2,600 tree saplings to employees across the system.

To date, 14 solar panel arrays installed across multiple Aspirus locations have enhanced energy security, delivering a total cumulative CO₂ reduction equivalent to the annual electricity usage of 135 homes.

Since making our transition to LED fixtures, we have replaced over 113,531 lamps throughout the Aspirus system.
