

# Screening Location Tip Guide

Helpful guide for individual interactions, personal protective equipment precautions, and other considerations for your employees to use for guidance during COVID-19 outbreak.

## Screening & Interaction

- Employee Entrance(s)
- And/Or Visitor/Vendor Entrance(s)
- And/Or Having any contact within 6 feet of another employee

## Contingency Measures

1. Screen in well ventilated spaces.
2. Screeners practice extended use\* of procedural or surgical facemasks; Use of facemasks for multiple subsequent days as they are fit for use.
3. Discard facemask when soiled, damaged, or hard to breathe through.
4. Screener only to wear gloves if open wounds are present to screeners hands or there is potential for physically touching the employee/visitor/vendor.
5. Have cloth masks available to Visitors/Vendors and hand them out as needed upon arrivals to your facility.

*\* Extended use of facemasks refers to the practice of wearing specific PPE for repeated close-contact encounters with several individuals, WITHOUT removing it (doffing) between encounters.*
