

Aspirus Emergency System Wide Guideline COVID-19

Clinical Training Upskill Approach

Approved 03.23.2020 16:15

For staff to continue to provide the safest most effective care, Aspirus is providing additional training to Nursing and Respiratory Therapy staff. This training will be administered through HealthStream with Job Aids, resources/references, and video among other options in caring for COVID-19 patients. In instances like this we believe it is best to overprepare you with information and the necessary training required for our emergency preparedness and ability to care for our patients.

Even if you may be familiar with some of the content being covered, we ask that you familiarize yourself with it so you have an awareness of what your peers are learning and to ensure that we're all coming from the same place.

Please recognize as you are going through the training you'll be part of an overall care team who will be there to support you, however, we expect that you have a basic understanding of the materials being covered in the instance you'll need to care for COVID-19 patients.

Target Audience	Training	Due Date
Nurses Respiratory Therapists	<ul style="list-style-type: none">• An e-learning will launch in HealthStream and Care Learning• Job Aids will continue to be added to the COVID-19 Information Center intranet page• Additional Videos will be communicated out as they are made available	One week from launch

The training focuses on:

- Assessment & Interventions
- Recognizing Respiratory Complications
- Sepsis
- Oxygen Delivery Devices
- Mechanical Ventilation
- Respiratory Treatments
- Caring for the Critically Ill Patient

As a reminder all protocols related to COVID 19 can be found on the Intranet under the Coronavirus (COVID-19) Information Center.
