

Exposure Follow-up Steps and Expectations

1. An Employee Health nurse will call you within 24 hours. If you don't receive a call after 24 hours, contact Employee Health by calling 715-847-2785 or ext. 72785 to get more information on any follow up you may need.
2. Employee Health will work with you to complete a Safety Zone event following the directions on the next page.
3. Employee Health will provide follow-up per our policy and as directed by our Medical Director and CDC recommendations. For additional information, you may review the Employee Health: Control of Communicable Illness Procedure.
4. Employee participation in the exposure follow-up is mandatory and is considered a Condition of Employment. Completion of your follow-up is due by the date provided to you by the Employee Health Nurse when you talk with them on the phone.
