

Aspirus Wausau Hospital Inpatient Rehabilitation

Summary of Patients Served in FY2025

"I'd like to express my sincere gratitude for everyone who worked with me during my stay on the rehab unit, from the doctors/therapists to the nursing/support staff. Everyone provide a superb level of care, and was very pleasant to work with. One unique aspect to this rehab program compared to others I experienced in the past is the community dining room and the ability to eat meals with other rehab patients. I found this to be very valuable as it provided some level of social interaction and the ability to empathize with and provide encouragement to others during their rehab journeys. The healing benefit of this can't be understated as it can otherwise be quite lonely if confined to your room."

More Patients Discharged to Home

A vital part of recovery for patients is the ability to be discharged directly to the comfort of their own home or the familiar surroundings of their Community Based Residential Facility. **80.6% of our patients achieved their #1 goal of going home compared to 79.7% of rehab patients in the region and 82.5% of rehab patients in the nation.**

Quality Care for Medical Problems

Aspirus Wausau Hospital Inpatient Rehabilitation continues to manage and treat our patients medical issues with the assistance of their medical doctors. Because of this teamwork, Aspirus Wausau Hospital Inpatient Rehabilitation has a 8% rate of unplanned transfers back to acute hospital care, compared to the 9% nationally. If you would like additional information, please discuss with your rehabilitation physician.

Patient Satisfaction
