Commission for Accreditation of Rehab Facilities (CARF), accredited since 1993 and accredited by the Joint Commission
Serving Our Patients

A firm commitment is made to involve our patients and family in their plan of care. Clear goals are established to challenge and motivate patients to assist them in improving their level of independence.

Patient Improvement Scores

Our patients have a markedly higher improvement in functional status within a shorter length of stay than the benchmark scores for both the region and the nation. In the tables below, higher scores indicate better performance.

Patient Diagnosis Groups

- **Average Age** = 65.1
- **Gender** = Male 64.5%  Female 35.8%
- **Average Therapy Hours** = 17.56 hours/7 days (Required is 15 hours/7 days)
- **Average length of stay for all diagnoses** = 12.3 days compared to region at 12.2 and nation 12.8.

A vital part of recovery for patients is the ability to be discharged directly to the comfort of their own home or the familiar surroundings of their Community Based Residential Facility (CBRF). Aspirus Wausau Hospital Inpatient Rehabilitation excels in getting patients functioning to a level where they can be reintegrated into the community.

Who Do We Serve?
FY22 Aspirus Wausau Hospital Inpatient Rehabilitation Patients by Impairment Group
Types Of Strokes

Total number of stroke patients served in FY2022: 50.
