Persist...Achieve...Inspire

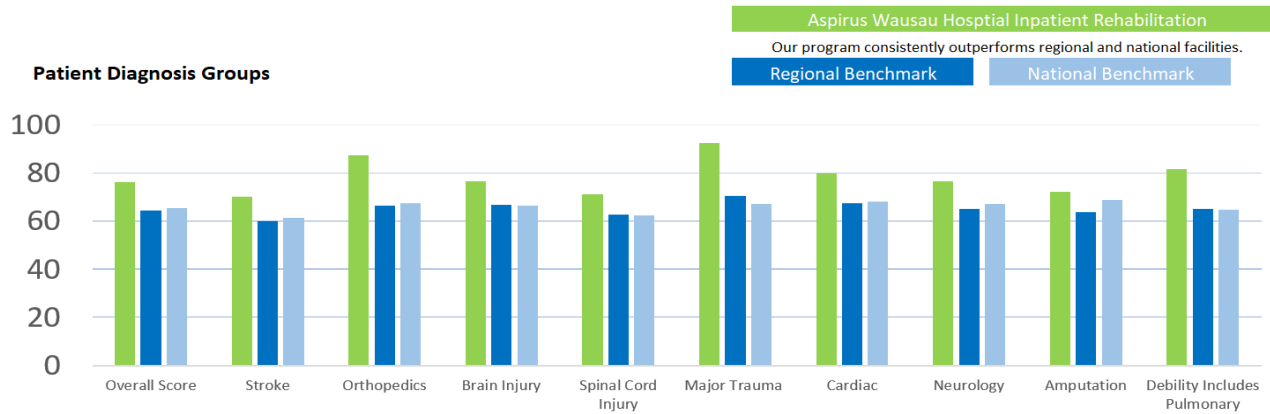

Serving Our Patients

A firm commitment is made to involve our patients and family in their plan of care. Clear goals are established to challenge and motivate patients to assist them in improving their level of independence.

Average Age	65.1
Gender	Male 67.9% Female 32.1%
Average Therapy Hours	18.77 hours/7 days (Required is 15 hours/7 days)
Average Length of stay for all diagnosis	12.1 days Compared to region at 12.5 and nation 12.9

Patient Improvement Scores

Our patients have a markedly higher improvement in functional status within a shorter length of stay than the benchmark

Percentage of Patients Discharged to Community (Home or CBRF)

Aspirus Wausau Hospital Inpatient Rehabilitation	Regional Benchmark	National Benchmark
91.7%	81.1%	82.6%

Source: USD^{MR} Adjusted Benchmark Comparison, 2018 Annual Report

Percentage of Patients Discharged to Acute Hospitals Planned or Unplanned (Lower is better)

Aspirus Wausau Hospital Inpatient Rehabilitation	Regional Benchmark	National Benchmark
5.8%	10.2%	9.6%

Inpatient Rehab excels at managing patient complications during their rehabilitation stay.

Source: USD^{MR} Adjusted Benchmark Comparison, 2018 Annual Report

A vital part of recovery for patients is the ability to be discharged directly to the comfort of their own home or the familiar surroundings of their Community Based Residential Facility (CBRF).

Aspirus Wausau Hospital Inpatient Rehabilitation excels in getting patients functioning to a level where they can be reintegrated into the community.
